Norwalk Community Health Center Launches New Web Site

Norwalk, CT (June x, 2011) - - The Norwalk Community Health Center recently launched a new web site: www.norwalkchc.org. The new site features useful content including Frequently Asked Questions (FAQs) for new patients, health practitioner biographies, a Google map functionality to help patients find the Center, as well as access to the Center's new video.

“The new site reflects the Center’s commitment to the growing needs of our patients,” says Chief Executive Officer Lawrence Cross. “Our patients, like all Americans, depend on online resources more than ever – via their computers or smart phones - and we need to be accessible to them.”

Norwalk-based marketing and communications firm, Snyder Group, Inc., designed the site leveraging the branded colors and graphics in the Center’s logo that are also used throughout the interior design of the Center itself.

The Norwalk Community Health Center is an independent Federally Qualified Health Center funded through the Health Resources and Services Administration. The Center offers a full range of primary care medical services to any Norwalk resident regardless of ability to pay, including Pediatrics, Adult Medicine, OB/GYN and specialty clinics in Endocrinology and Infectious Disease. Its medical staff consists of board certified or board eligible physicians, nurse practitioners and certified nurse midwives. It is located at 120 Connecticut Avenue and is open by appointment Monday through Friday and on Saturday mornings. For more information or to make an appointment, call (203) 899-1770.
